India 3

India

Dear potential customer/s from India,

as you might imagine yourself, this great and awesome hackster.io - article is generating a lot of interest from all over the world and huge amount of [preorders](#). Sure we are happy about that. But things are a little bit more complicated, not only because of Corona.

We will answer your questions with a link to this wiki, so we need to write and update the text only in one place.

Unfortunately chipcrisis prevents us from producing the tracker today.

As soon, as all necessary components will be available, we will ramp up production immediately. All is ready and prepared for that „GO“.

We will start with 868 MHz trackers for the European Market first, then we will swap into other frequencies and adapt the first model to serve your market.

We know, there are lots of animals in India and the demand is really huge, not only cows, but also sheeps... and others.

We will tell you later about shipping costs here

Regards

Molly Cattracker Team
